What everyone asks first.

Q. What do I need to provide?

A domain name (purchased and owned by you), and your content — text, images, logos. The faster you ship these, the faster we launch. No content yet? See the Add-ons menu — copywriting from \$99/page, photography from \$499.

Q. How long does it really take?

Landing page: 3–4 days. Hotel / business / portfolio: 5–7 days. E-commerce / multi-page corporate: 2–3 weeks. Timelines assume content + assets are ready on day 1. We commit a date upfront and we hit it.

Q. What if I want changes after launch?

One free revision round before launch. First 2 weeks post-launch, minor tweaks on us. After that — \$25/hour pay-as-you-go, or our \$49/month maintenance plan.

Q. Where is the site hosted?

Vercel free tier deployed under your account — sub-2-second loads worldwide, 99.9% uptime, \$0/month for most sites. Prefer your own host (AWS, DigitalOcean, traditional cPanel)? We'll set it up there. Domain is purchased and owned by you directly — never us.

Q. Do you do SEO?

Every site ships with technical SEO baked in (Schema.org, semantic HTML, fast LCP, sitemap). For ongoing content + backlinks, see the Add-ons menu — local SEO (\$299), monthly blog content (\$129/article).

Q. Do I own the site?

Fully. Code repository + admin access transferred to your name on launch day. No vendor lock-in. You can move to another agency or take it in-house anytime.

You see real, custom design before paying anything. No commitment until you're ready.

Once you're satisfied with the flow and want to continue, a 25% advance kicks off the full project. Walk away anytime before this — zero cost.

4 75% ON DELIVERY · LAUNCH

Pay the rest when we deliver

Final 75% only after launch — when the site is live, tested, and signed off. You hold all the leverage until the very end.
